Introducing Hunting's FLYING SQUAD - a dedicated service team which delivers on on location recertification and equipment servicing solutions.

Maximise operations, minimise logistics and lower costs.

Your equipment is critical to well operations, therefore ensuring it is tested and inspected in-line with industry standards is a constant challenge for equipment owners.

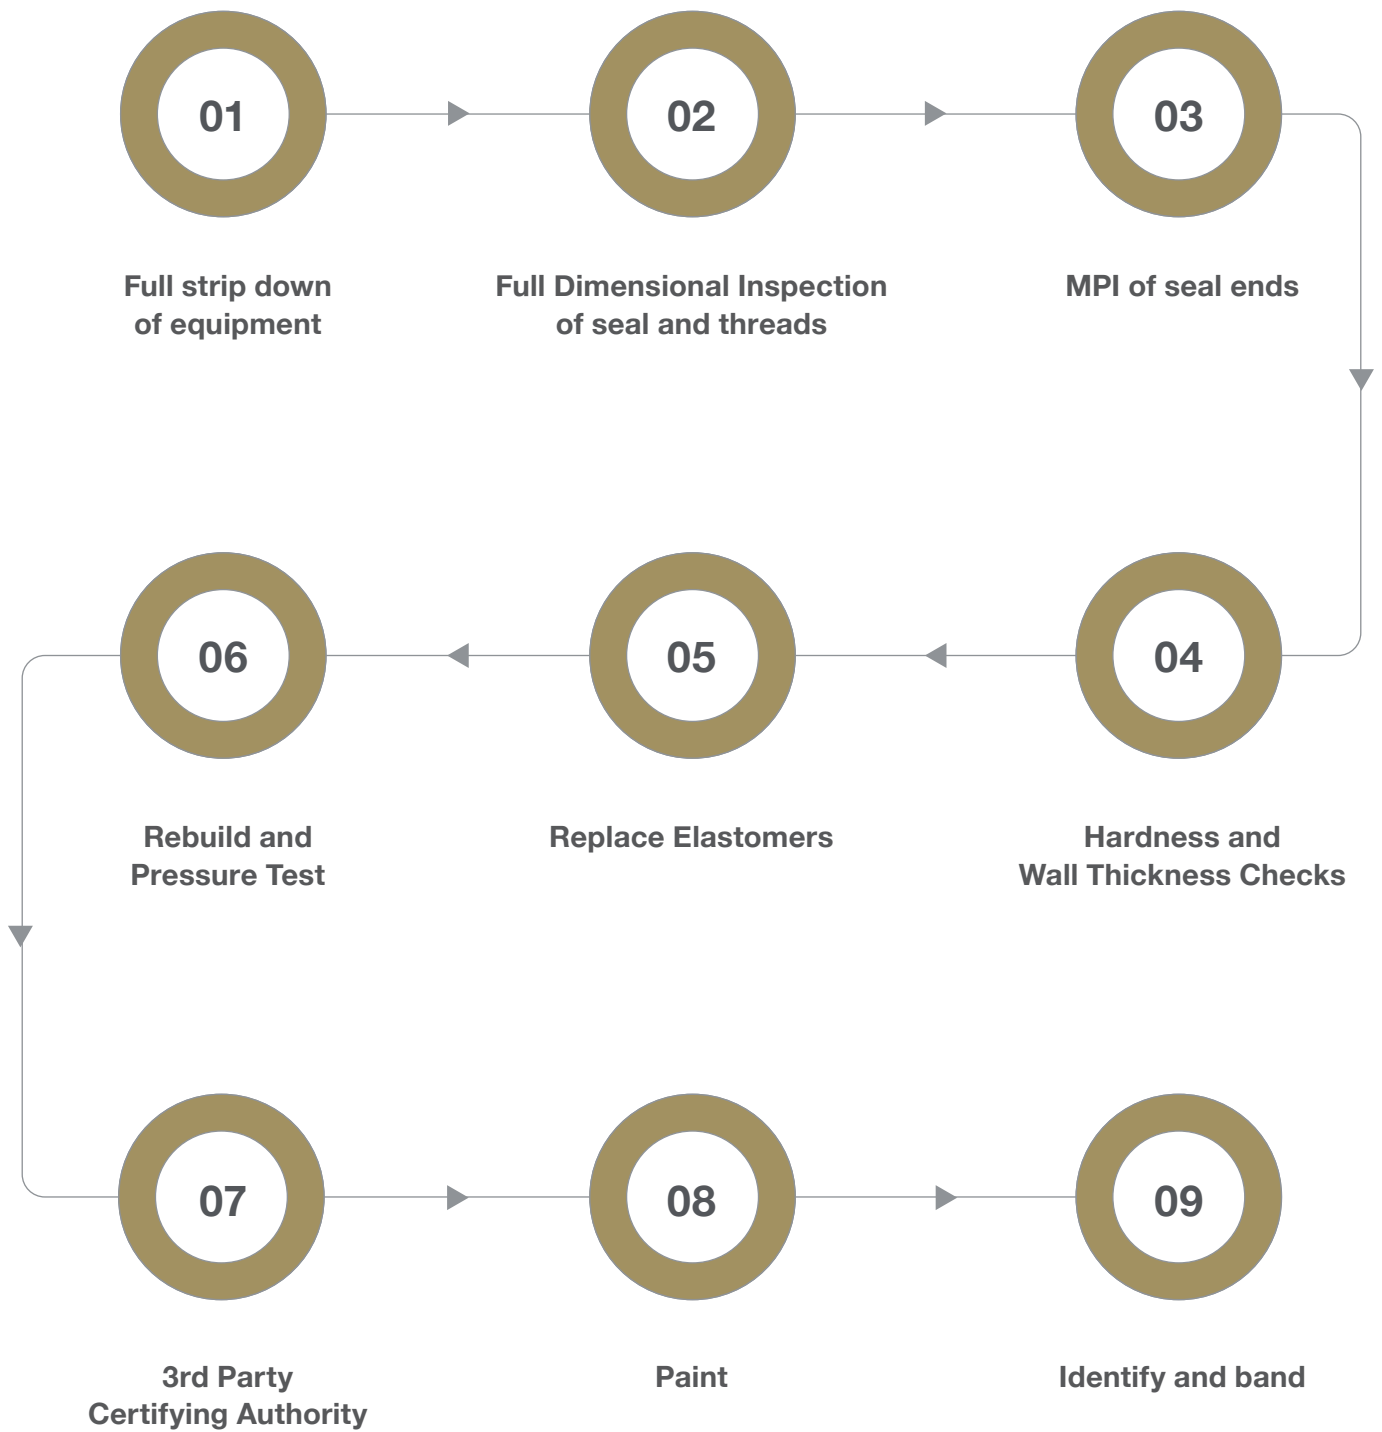

Hunting provides a complete managed solution offering on location recertification service for well intervention equipment, allowing you to maximise operations, minimise logistics and lower costs.

Irrespective of the scope of recertification or service required, Hunting can provide a fully flexible solution to meet the customer's requirements.

Highly skilled and experienced technicians Mobilised at short notice to locations worldwide.

Working within existing customer facilities or from a fully equipped and serviced portable pressure test container/workshop, our highly skilled and experienced technicians can be mobilised at short notice to locations worldwide.

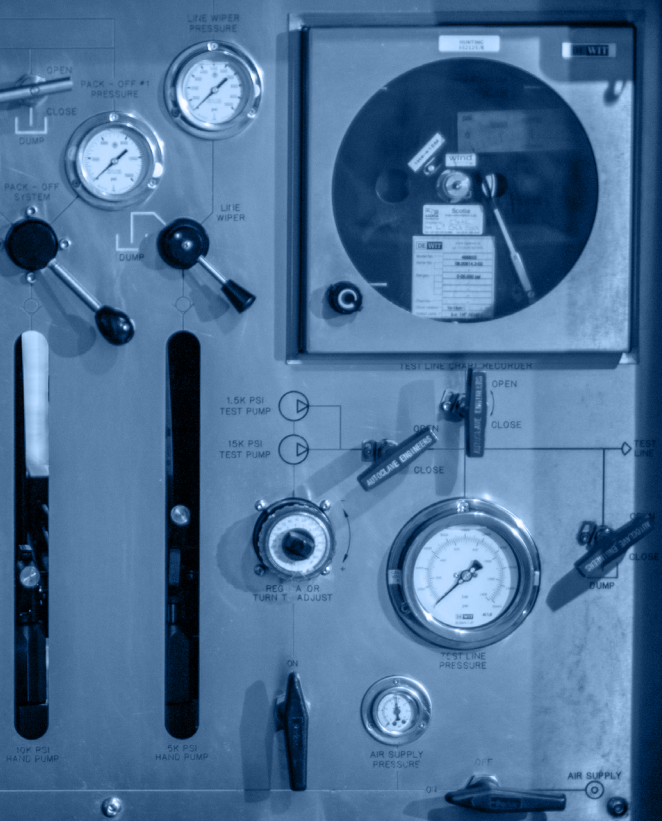

Prior to mobilisation of the FLYING SQUAD, our technicians will evaluate the exact requirements and all necessary spare parts, redress kits, hand tools and inspection equipment will be sent to the customer location. This ensures that the FLYING SQUAD can begin performing duties as soon as they arrive on location, resulting in cost savings to the customer.

Specialised equipment maintenance training to local personnel.

Both Annual and Major certification can be provided to the customer by means of sending the test data to our in-house third party Certifying Authority, or alternatively by arrangement with a local Certifying Authority.

An additional service that the FLYING SQUAD can provide is specialised equipment maintenance and familiarisation training on Hunting PCE. This training can be conducted within the country the customers equipment is held in or alternatively it can be conducted within a local Hunting facility.

Products and Services

Hunting provides products and services to the world's leading national, international energy companies and oil service companies enabling the extraction of oil and gas. Manufacturing and sales locations are located in the key energy producing regions of the world.

Proprietary Technology

Hunting owns and develops proprietary patented products with a full range of applications below the wellhead including mud motors, premium connections, well perforating, logging and intervention tools.

Geographic Footprint

In strategic locations around the world Hunting owns and operates plants, properties and equipment employing people to serve its global customers with local services and products.

Health, Safety, Environment and Quality Assurance

Hunting is committed to working safely in an environmentally responsible manner. These principles are fully integrated within our Quality Management System that defines the company's global operations.

Quality Assurance

It is essential that products and services provided by Hunting are designed and manufactured to conform to the agreed API, proprietary licensor, or other specification of the customer, meeting their needs and expectations the first time, every time.

It is the policy of Hunting that only the highest quality products and services, that meet all specification requirements, are provided to customers. Hunting operates a corporate Quality Management System covering all worldwide locations.

Health, Safety and the Environment

Hunting is committed to achieving and maintaining the highest standards of safety for its employees, customers, suppliers and the public. All Hunting business units consciously operate in a manner that includes environmental matters as an integral part of its business plan.

Hunting's aims are no accidents, no harm to people, and no damage to the environment.

The Hunting goal is **"Total Customer Satisfaction"**.
