

Modular Over The Line (OTL) Weight Bar

Titan Division | Wireline Hardware

Hunting Titan’s Modular Over The Line (OTL) Weight Bar is the easiest and most reliable way to increase tool string weight.

Hunting Titan’s Modular Over-the-Line (OTL) Weight Bars allow the user to increase tool string weight without having to cut the wireline or insert unreliable in-line sinker bars. The compact 3ft long sections are stackable and easily added to ensure tool string weight can overcome well pressure during run in hole. The Modular OTL Weights are also compatible with existing OTL fishing necks and cable head sizes 1-7/16” or 1-11/16”. The 1/2” ID bore accommodates standard wireline and coated line cables.

Features and Benefits

- Stackable 3’ long sections
- Add OTL weights without re-heading
- Eliminates unreliable in-line sinker bars
- Compatible with existing fishing necks and cable heads
- Accommodates standard and coated wireline

Associated Hardware P/N’s	Fishing Neck	Bottom Adapter	
		FOR 1-7/16” CH	FOR 1-11/16” CH
